

Hello,

I am for the merger, but only because of the anti-competitive deals the NFL and MLB are able to make with these companies. Similarly to how Direct TV has sole rights to sell the NFL season package, these satellite radio companies have exclusive rights to broadcast all of the games. They can then charge any price they want for them.

Since these deals are in place, this merger would be good for everyone so that you can subscribe to one service and get all the content you want.

I also think these companies are in direct competition with over the air radio, HD radio and Internet radio.

Thank you,

Benjamin Nelson
